DETAILED ACTION

1. This action is responsive to amendment received on April 11, 2008. Claims 5 and 17 were canceled. Claims 1-4, 6-16 and 18-30 are pending examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4, 6-16 and 18-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Anderson et al., U.S. Patent No. 7,089,316 (referred to hereafter as Anderson).

As to claim 1, Anderson teaches a method of providing access to services across a computer network, comprising the step of:

generating an access request, said access request including a network device description and a plurality of service requests indicative of computer services for which the network device requests provisioning (see col. 5 lines 64-col. 6 lines 2, col. 5 lines 38-54 and col. 10 lines 1-9);

wherein the device description includes one or more of a device vendor, device type, device version and physical location (see col. 6 lines 3-58, the order includes a request for a storage device "device type" with the access request); and

Art Unit: 2157

forwarding said access request for authentication and authorization (see col. 10 lines 10-41).

As to claim 2, Anderson teaches a method according to Claim 1 in which the access request is a RADIUS packet, the service requests being defined by information contained within Vendor-Specific Attribute (VSA) blocks in the said packet (see col. 10 lines 10-41).

As to claim 3, Anderson teaches a method according to Claim 2 in which each said block contains a device-type identifier and a service-request identifier (see col. 5 lines 38-col. 6 lines 2).

As to claim 4, Anderson teaches a method according to Claim 2 in which the packet is a RADIUS-compliant authentication request packet (see col. 10 lines 20-31).

As to claim 5, Anderson teaches a method according to Claim 1 in which the device description includes one or more of device vendor, device type, device version, physical location (see col. 5 lines 38-col. 6 lines 2).

As to claim 6, Anderson teaches a method according to Claim 1 in which the service requests include a request for a particular service level (see col. 5 lines 38-col. 6 lines 2).

As to claim 7, Anderson teaches a method according to Claim 1 in which a policy is applied to the access request to determine whether access will be allowed, and if so for what services (see col. 9 lines 35-67).

Application/Control Number:

10/691,994

Art Unit: 2157

As to claim 8, Anderson teaches a method according to Claim 1 in which a network resources are provisioned in dependence upon the access request (see col. 9 lines 35-67).

As to claim 9, Anderson teaches a method according to Claim 1 in which the steps of receiving and applying are performed by an access-control server or an Authentication, Authorization and Audit (AAA) server (see col. 10 lines 20-54).

As to claim 10, Anderson teaches a method according to Claim 9 in which the access-control server uses the access request to select among multiple services that are specified for a particular device (see col. 9 lines 35-67).

As to claims 11, 13, 19 and 23, Anderson teaches a network device, system and medium arranged to provide access to services across a computer network, comprising:

means for generating an access request, said access request including a network device description and a plurality of service requests indicative of computer services for which the network device requests provisioning (see col. 5 lines 64-col. 6 lines 2, col. 5 lines 38-54 and col. 10 lines 1-9); and

means for forwarding said access request for authentication and authorization (see col. 10 lines 10-41).

Claims 12, 14-18, 20-22 and 24-30 do not teach or define additional limitations over claims 1-11, 13, 19 and 23 and therefore are rejected for similar reasons.

3. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

10/691,994

Art Unit: 2157

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUSSEIN A. EL CHANTI whose telephone number is (571)272-3999. The examiner can normally be reached on Mon-Fri 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on (571)272-4001. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
